

SERIE SS-ZDBZ

*Gauze Swab Folding and Packing Machine
(un-folded edge & 4-side seal)*

This continuous production line seamlessly connects gauze swab folding with 4-side seal packaging, outputting finished gauze swabs packaged in paper pouches containing 1 to 2 pieces each pouch (see above image).

The connection between folding and packaging has significantly reduced labor costs, reduced the risks such as packaging quantity errors caused by manual feeding and improved production efficiency.

SERIE SS-ZDBZ

*Gauze Swab Folding and Packing Machine
(un-folded edge & 4 side seal)*

TECHNICAL SPECIFICATIONS

Equipped with a 4 lanes gauze swab folding machine, directly output (feeding) into the packing machine input tracks, It simplifies the process in the traditional production line where the need to manually feed the fabric pieces into the packaging machine is eliminated.

The presser design ensures that the gauze swab are flat before being fed into the paper pouch.

Mobile sealing platform seal the 4-side in the same time with average pressure and temperature, ensure the packing pouch sealing quality to meet the strict requirements of the medical industry standards and sterilization requirement.

SERIE SS-ZDBZ

*Gauze Swab Folding and Packing Machine
(un-folded edge & 4 side seal)*

The output system is equipped with a counting and grouping function, which is convenient for the following production process.

Technical Parameter

Folding speed	360-640 pieces / min
Packing speed	10-25 sealing circles / min
Gauze swab size	5x5cm, 7.5x7.5cm, 10x10cm (accept customize)
Packing pouch size	As customize
Total power	18.9KW
Compressor air	0.8MPa
Overall dimension	9800x1750x2700mm
